Avoid release to the environment.

Dispose of contents/container in accordance with local regulations.

Repeated exposure may cause skin dryness or cracking

To avoid risks to human health and the environment, comply with the instructions for use

WARNING

IE/BPA 70760

Use biocides safely and sustainably.

It is illegal to use this product for uses or in a manner other than that prescribed on this label.

Poison information: for information or to report a poisoning incident contact the National Poisons Information Centre, Beaumont Hospital, Dublin (01-8092166), retain the label for reference.

First aid instructions

Eye contact: Immediately flush with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses if easy to do. Continue to rinse with tepid water for at least 10 minutes. Get medical attention if irritation or vision impairment occurs.

Skin contact: Remove contaminated clothing and shoes. Wash contaminated skin with water. Contact poison treatment specialist if symptoms occur.

Ingestion: Wash out mouth with water. Contact poison treatment specialist. Seek medical advice immediately if symptoms occur and/or large quantities have been ingested. Do not give fluids or induce vomiting.

Inhalation of dust: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Seek medical advice immediately if symptoms occur and/or large quantities have been inhaled.

In case of impaired consciousness place in recovery position and seek medical advice immediately.

Keep the container or label available.

Mode of action

Enclean® is an algacide containing nonanoic acid (53.97% w/w) with algacide effects outdoors on buildings and building materials, on all hard surfaces in green spaces and on every roof type (except thatched roof) for use by professionals.

The method of application for Enclean® is spraying.

Uses

Crops/Situations	Maximum individual dose (undiluted product)	Maximum number of applications (per year)
Green algae (Chlorophyta spp.)	1.8 mL / m ²	2

Application method and application rate

The product must be sprayed after dilution directly on the surfaces to be treated.

Application rate: 1.8 mL (undiluted product) / m²

The product should be diluted in water before application. Mix one part Enclean® to 28 parts water. This in practice, equates to 52 mL diluted product per m².

Operator protection

During the filling and mixing process, facial exposure to splashes must be limited.

The use of Personal Protective Equipment (PPE) and the application of technical and organisational Risk Management Measures (RMM) are required:

- Eye protection;
- Minimise splashes and spills;
- Minimise number of staff exposed.

Storage:

- Keep in a dry, cool, well-ventilated area.
- Keep in original container.
- Shelf life: 2 years
- It is recommended to store the product at a temperature above 8°C

Instructions for safe disposal of the product and its packaging

- Dispose of unused product, its packaging and all other waste, in accordance with local regulations.
- Do not discharge unused product onto the ground, into water courses, into pipes (sink, toilets...) or down the drains.

Instructions for use

Enclean® can be used on most building materials, pavements, paving blocks, steel, zinc, aluminium, tiles, bitumen, exterior wood, plastic/glass of greenhouse walls (outside), stones, non-grassed sports courses such as athletic tracks.

Do not apply to synthetic resin, copper, lead or thatched roof surfaces.

For zinc, aluminium, stainless steel, steel: If a thin white layer persists 14 days after treatment, rinse with clean water.

For any other materials than those listed above (including limestone), perform a test on a non-visible corner before extending the application to the entire surface.

Respect the dose of product per square metre, especially on painted surfaces (e.g. plaster).

After each treatment, clean the spray equipment by rinsing with water.

- Avoid direct or indirect contact with food and feed.
- Always read the label or leaflet before use and follow all the instructions provided.
- The diluted solution should be used immediately.
- Only apply this product with a hand-held manually operated low pressure (3 bar or below) device preferably in combination with a spraying shield.
- Agitate during application
- Do not treat in rainy weather or on frozen surfaces.
- Do not clean the surface after treatment.
- Allow the product to take effect for at least several days.
- Users should report ineffective treatment to the registration holder.

Risk mitigation measures

- Product can only be used if the weather forecast shows no rain for the day of application.
- During application, the soil and plants adjacent to the treated area should be protected.

Production date / Batch number: see packaging

BIOCIDES

**enclean®**

Contents:

1L e

Curative, algacide effects on outdoor buildings and building materials, on all hard surfaces in green spaces, on every roof type (except thatched roof).

An emulsifiable concentrate (EC) containing 500 g/L (53.97% w/w) nonanoic acid

Authorisation number: IE/BPA 70760

**Read instructions before use
FOR PROFESSIONAL USE ONLY**

**24 hour emergency number:
0032 14 58 45 45**

1L will treat a maximum area of 556 m²
