

## Stewardship advice for pre-emergence cereal herbicides

- Ensure Boom height is maintained @ 50cm above target.
- Keep forward speeds < 12km/hr.
- Apply with a Droplet Spectrum of Coarse to Very Coarse, use 3\* LERAP (minimum 75% Drift Reduction Nozzles) at correct drift reduction operating pressures.
- Apply at 200 L water/ha.
- Wind < 4 m/s.
- Do not apply in still wind conditions (Force 0)
